

# STONHARD®

## SEAMLESS PROTECTION FOR PARKING STRUCTURES

Manufactured and installed high-performance solutions for parking decks, garages and high-traffic pedestrian applications.

## DURABILITY & DESIGN

Planners, contractors, operators and owners know there is much more to a parking structure than simply providing space for parked cars. Parking structures are public spaces that create a first impression and a lasting one. New construction or rehab, interior and exterior decks, stalls, ramps and entrances must be safe for pedestrians and vehicles with brightly lit, slip-resistant, level surfaces that are able to withstand all types of temperatures and weather conditions, as well as corrosive materials (oils, petroleum, salts) and continuous vehicular traffic. And when all this performance is combined with strong design, you have a long-lasting, cost-effective parking structure and a welcoming commercial space that extends to office buildings, hotels, stadiums, hospitals, universities, malls and airports.

Stonhard offers five tailor-made formulations in a decorative color palette to meet exterior and interior deck requirements.

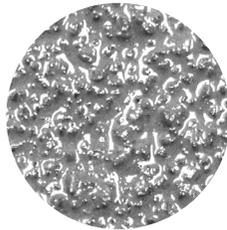

**Stondeck XD2** – Long-lasting, interior, high-traffic, high-volume applications.

**Stondeck XD4** – High traffic, UV-stable for exterior ramps, entrance lanes and exposed parking decks. Superior protection against abrasion.

**Stondeck FD2** – Flexible, waterproof decking system for interior parking stall applications. Cost effective system for new construction and repairs to low volume traffic areas.

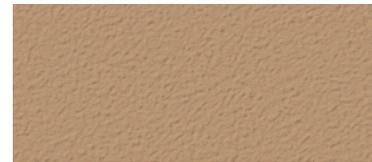

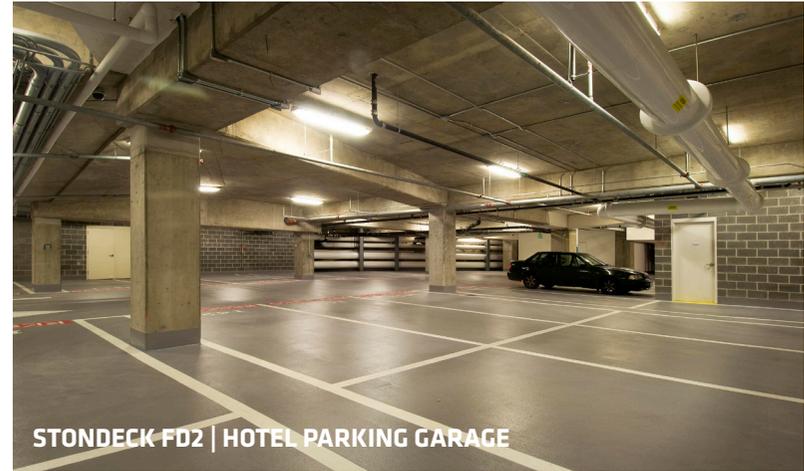

**Stondeck FD2 HD** – Heavy-duty, flexible, waterproof for high-traffic interior commercial garages. Crack bridging with tough broadcast layer.

**Stondeck FD4** – UV-stable, waterproof, maximum durability & flexibility for exterior top deck applications.

Note: Color reproductions are shown for color only and are as accurate as modern photography and quality printing methods can produce. For actual color and texture request a sample.

## ENGINEERED PERFORMANCE

Urethane technology has the longest track record of traffic coating systems. These systems can be customized for increased durability, rigidity, moisture resistance and slip resistance. We optimize resin chemistry and technology to produce extraordinary performance to meet your specific requirements.

**Impact Resistant | Chemical Resistant | Abrasion Resistant | Wear Resistant | Waterproof**

STONDECK XD4 | INTERIOR/EXTERIOR RAMPS

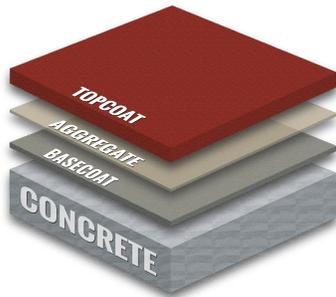

STONDECK FD2-HD | INTERIOR

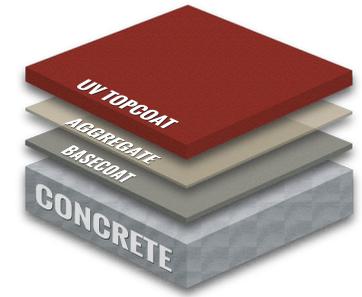

STONDECK XD2 | INTERIOR ELEVATED DECKS

**STONDECK XD2**  
High-Traffic Interior Drive Areas

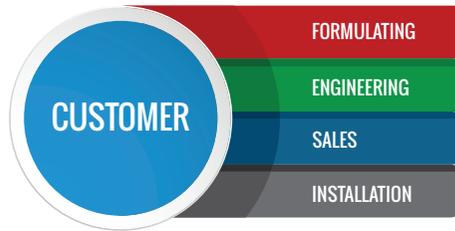

**STONDECK XD4**  
High-Traffic, UV-Resistant Flexible System

## RESPONSIBILITY & DETAILS

The quality of the installation is as essential as the quality of the product. We are a turnkey operation, taking responsibility from manufacturing of products to preparation of the concrete, new or existing, to the final walk through of your project. Whether new construction or repair and rehabs, we cover the details: crack bridging and addressing concrete repair. When you work with Stonhard, you also have the support of our expert Technical teams and Construction Management Group. Combining products, installation and vast resources safeguards your success. We manufacture, install and provide a single-source warranty on it all, taking responsibility and standing behind our work.

## SINGLE SOURCE COMPLETE TURNKEY OPERATION

### STONDECK FD2

Light-duty Interior Stalls

### STONDECK FD4

Flexible, UV-Resistant Exterior System

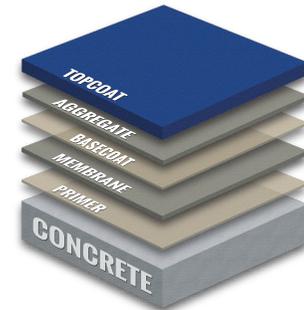

Stonhard applicator applying a crack treatment before applying Stondeck product

Final result, a highly-durable surface ready for continuous traffic

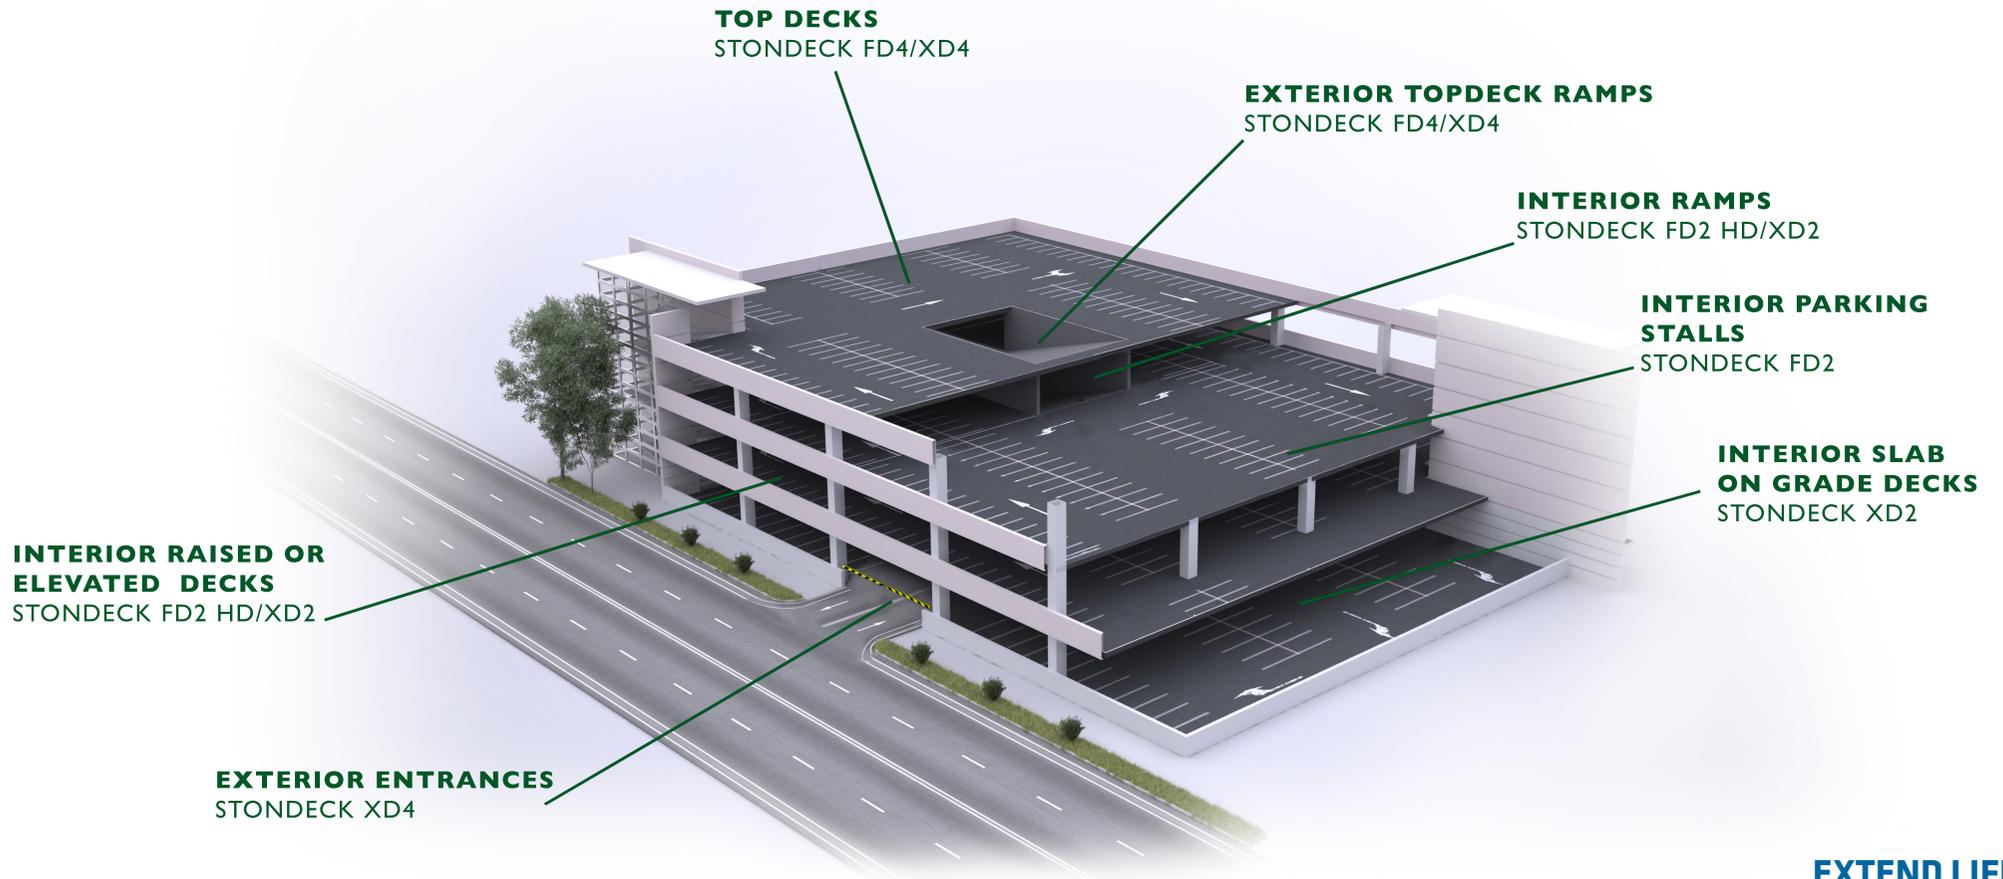

### STONDECK FD2 HD

Flexible, Heavy-Duty Decking System

# PARKING STRUCTURE SOLUTIONS

CUTAWAY OF A PARKING STRUCTURE

- EXTEND LIFE**
- ENHANCE APPEARANCE**
- OPTIMIZE LIGHT REFLECTIVITY**
- DECREASE NOISE**
- REDUCE MAINTENANCE COSTS**
